

Instructions for written report

Please turn in a 2-page report in 10 point format (approximately 1000 words). The report format is up to you, but it should be written in the form of an essay and not just as a list of bullet points. One suggested format is to include the following sections in each report:

1. What were the topics of the assigned readings? Or what problem were they trying to solve?
2. What did you learn from the readings regarding the reading's topic or problem?
3. What questions were you left with?
4. Did you disagree with anything that you read?
5. Did the readings cause you to think of any new ideas? What were these?
6. Did you look at any of the citations cited by the readings? Did you learn anything from these citations?

Ultimately, the format above is just a guideline and isn't meant to constrain you in any specific way. If it helps, here are some examples of reports from a similar course:
